## **DETAILED ACTION**

## Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: Claims 1-43 are allowed because the prior art fail to teach or fairly suggest a device as cited in the claims.

Vail et al. (US patent 6549329) discloses in Fig. 1, 2-13 a laser device comprising a laser gain section 11 including doped fiber amplifier and a linear optical cavity having first and second reflectors 12, 14, 16, or 18, etc. Vail further discloses in Fig. 9 a loss element 110 (could be a filter, col. 10, lines 37-38) but fails to provide first and second optical polarization elements in said cavity respectively located on two opposite sides of said laser gain section to make counterpropagating light beams at the laser wavelength reflected from said first and second reflectors to have orthogonal polarizations between said first and second polarization elements.

Boffi et al. (US Patent 6259552) teaches a laser device in Fig. 5 with a laser gain section 205, first and second optical polarization elements 450 and 470 and filter 460. However, Boffi does not teach a linear cavity having first and second optical reflectors.

Both of Vail and Boffi do not provide any reason to combine their inventions such that the invention of Boffi could be placed in a linear cavity with two reflectors on both sides and all of other elements are positioned inside as indicated in the claim.

Art Unit: 2828

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Page 3

## Citation of Pertinent References

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The patent to Boffi et al. discloses Optical Wavelength Converter, U.S. Patent No. 6259552

The patent to Vail et al. discloses Multiple Wavelength Optical Sources, U.S. Patent No. 6549329

## Communication Information

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phillip Nguyen whose telephone number is 571-272-1947. The examiner can normally be reached on 9:00 AM - 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MINSUN HARVEY, can be reached on 571-272-1835. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
